OBJECTIVE

Recent B.Tech graduate in Artificial Intelligence and Machine Learning with a solid foundation in machine learning, data analysis, and problem-solving. Proficient in Python and SQL, with a strong interest in building intelligent systems. Seeking an entry-level AI Engineer role to contribute technical skills, learn from industry experts, and grow in a dynamic, innovation-driven environment.

EDUCATION

CMR College of Engineering & Technology B.Tech in Artificial Intelligence and Machine Learning, CGPA: 8.0/10	Hyderabad, Telangana
Minor in Data Science, CMR College of Engineering and Technology, CGPA: 8.3/10	Hyderabad, Telangana
SVS Group of Institution's Associate Degree/Diploma in Computer Engineering, CGPA: 7.3/10	Hanmakonda, Telangana
Board of Secondary Education, CGPA: 9.3/10 St Ann's High School	Jangoan, Telangana

PROJECTS

Team Task Manager (MERN Stack)

- Developed a full-stack task management application using MongoDB, Express.js, React.js, and Node.js
- Implemented secure user authentication with JWT-based login and registration system
- Built task creation, update, deletion, and status tracking features with responsive UI
- Deployed the application using Vercel and Railway with MongoDB Atlas cloud database integration
 - Live Demo : <https://team-task-manager-oztv-git-main-adhithya-s-projects.vercel.app/>
 - GitHub : <https://github.com/adhithya2322/team-task-manager>

Depression Detection using Deep Learning

- Developed a text classification model using Python and NLP techniques to detect early signs of depression from social media data
- Preprocessed unstructured text data using tokenization and feature extraction methods
- Implemented deep learning models to improve classification accuracy
- Demonstrates application of AI in mental health analytics and real-world problem solving

Phishing Website Detection using Machine Learning

- Built a machine learning model to classify phishing and legitimate websites using URL and behavioral features
- Performed data preprocessing, feature engineering, and anomaly detection
- Improved detection accuracy through pattern recognition techniques
- Applied AI concepts in cybersecurity and threat detection

Customer Sentiment Analysis using NLP

- Performed sentiment analysis on large datasets using Python (Pandas, NLP techniques)
- Classified customer feedback into positive, negative, and neutral categories
- Generated insights to support business decision-making

TECHNICAL SKILLS

Programming: Python (Pandas, NumPy, Scikit-learn), JavaScript, SQL	Frontend: React.js, HTML, CSS
AI/ML: Machine Learning, NLP, Deep Learning	Backend: Node.js, Express.js
Tools: Git, GitHub, Excel	Database: MongoDB, MongoDB Atlas
AI Tools: Generative AI Concepts, ChatGPT, Prompt Engineering	Deployment: Vercel, Railway
Data Skills: Data Cleaning, Visualization, Data Analysis	

CORE COMPETENCIES

Machine Learning Fundamentals	Problem Solving & Logical Thinking
Data Analysis & Interpretation	Communication & Team Collaboration
AI Model Development	

CERTIFICATIONS

- Artificial Intelligence Primer Certification – Infosys Springboard (2026) | [Infosys Springboard](#)
- Salesforce Certified Agentforce Specialist – Salesforce (2025) | [Certification - Verify Credentials](#)
- AWS Academy Cloud Foundations – AWS Academy (2024) | [Badge - Verify Credentials](#)
- Python Programming Course – Naresh i Technologies (2023) | [Python - Verify](#)
- Industrial Training in .NET & Python – Softwayz IT Solutions (2021–2022) | [Softwayz IT Solutions](#)

ADDITIONAL INFORMATION

- Merit Scholarships:** Granted 100% tuition fee Scholarship for Bachelor of Technology and 80% tuition fee Scholarship for Associate Degree, based on outstanding performance in entrance exams and exemplifying eligibility for merit scholarships.
- Community Service:** Collaborated on a Clean-up project in the Hanmakonda, resulting in a cleaner community and a stronger sense of connection with neighbors (2019 - 2022).
